

Prepare for Cold Weather

WITH OUR ENERGY EFFICIENCY PROGRAMS

2026 Energy Efficiency Rebates!

Our rebates can help you prepare your home for colder weather while reducing energy usage and improving efficiency.

Consider this your guide to winter-ready comfort: simply **upgrade to qualifying equipment.**[†] Here's how it works: install

any of the energy-saving equipment found on our website and scan the QR code to submit your rebate application online or by mail.

Visit ColumbiaGasVA.com/Rebates2026 for more information.

[†] WarmWise rebates are only available to existing residential customers of Columbia Gas of Virginia. Rebates are for qualifying new equipment that are replacements of existing equipment and must be purchased and installed at the Account Owner's service address. To qualify for a rebate, the qualifying equipment must be purchased and installed on or after January 1, 2026, and the rebate application must be received within 120 days of purchase and installation or by January 31, 2027, whichever is sooner. The primary fuel source for installed equipment must be natural gas. Rebate quantities are limited, not guaranteed, and are processed and approved on a first-come, first-served basis. Rebates are only available for retrofit installations in existing homes. New construction is not eligible.

Transform Your Home's Comfort

Free Online Home Energy Audit!

Preparing for colder weather starts with understanding how your home uses energy. Our **FREE Online Energy Audit** makes it easy to identify ways to reduce energy use, improve comfort, and get ready for the season. Qualifying customers will also receive a **FREE**

energy efficiency kit* with items that support everyday energy-saving habits.

Go to ColumbiaGasVA.com/Audit2026 to get started.

*Available only to Columbia Gas of Virginia customers who have completed the Online Home Energy Audit. Customers who have natural gas water heating will receive an energy efficiency kit that contains one kitchen faucet aerator, two-bathroom faucet aerators and two high-efficiency showerheads. Customers who have natural gas heat will receive an energy efficiency kit that contains 10 switches and outlet insulation gaskets, one tube of caulk and one can of foam sealant. Qualifying customers can receive only one of each type of energy efficiency kit. Qualifying customers can return to update their home profile to receive the other energy efficiency kit.
